I'm a **Full Stack developer in training**, *passionate about the world of programming with a particular interest in the* **MERN** *stack. I'm currently focused on learning and improving every day, acquiring* **the most in-demand technologies**. *In the future, I aspire to work on what I love most: creating* **appealing interfaces**, *developing efficient solutions, and contributing to projects that* **help people** *through technology.*

PROFESSIONAL EXPERIENCE

Full-Stack Ecommerce for a Cap Store in Argentina

- **Role:** Backend Developer
- **Technologies:** NestJS, MongoDB, Cloudinary
- **Description:** Developed the API and server, including image handling with Cloudinary. Future plans include implementing features such as authentication with Passport-JWT, payment gateway integration with Stripe, and email handling with Twilio.

API with Handlebars Views for Ecommerce

- **Role:** Backend Developer
- **Technologies:** Express, MongoDB, Handlebars, Passport, Socket.io, Stripe, Twilio
- **Description:** Created an API with views to simulate a simple ecommerce interface, managing product, cart, user, and ticket data. Implemented authentication with Passport, real-time chat with Socket.io, and payment gateway integration with Stripe. Next improvement: integrate React/Next.js for the frontend.

Personal Portfolio

- **Role:** Frontend Developer
- **Technologies:** Next.js, TailwindCSS
- **Description:** Developed my personal portfolio to showcase my projects and skills, highlighting a modern and responsive design.
